

# Pediatric Dentistry

Welcome to our practice and thank you for choosing Pediatric Dentistry! We look forward to teaching your child the importance of forming healthy dental habits that will last a lifetime.

During your initial visit, we will review your child's medical and dental history and address any concerns you have about your child's teeth. If your child is ready, we will clean their teeth and apply a topical fluoride varnish. We will also demonstrate effective brushing and flossing techniques for your child. One of our pediatric dentists will examine your child and may recommend digital radiographs. The dentist will then discuss any findings with you along with any treatment recommendations.

Please take a moment to review our [Your First Visit](#) page for helpful information regarding your child's initial visit to our office. Our complete new patient information packet is available for you to review online. Before your first visit, please fill out the [New Patient Form](#) online and submit electronically to either our Concord or Marlboro office. Download, print, and sign the [Privacy Policy Form](#) and the [Financial Policy Form](#). If you prefer to receive our new patient information packet by mail, simply ask our receptionist when you call to make your child's appointment.

We understand that most parents are nervous about how their child is going to react at his or her first dental visit. Our goal is for all our new patients to have a fun, exciting, interesting, and educational visit. We are committed to providing the most positive dental experience we can for your child. This is your child's first visit to our office and we want it to be an awesome one.

We look forward to seeing you soon!

The Doctors and Staff at Pediatric Dentistry,

**Neale I. Eckstein, DDS Joseph A. Jarosz, DDS Pamela J. Hom, DMD Young Yi, DMD**
